

Smart Kiosk - Skyus USB Modems

Skyus USB modems are the go to platform linking customers and companies in real time. Smart kiosks react to user interaction, capturing metrics through multitudes of sensors, differentiating needs and choices, and promoting social interaction with a Skyus USB modems inside. With seamless integration, the Skyus USB modems performs like an embedded modem, supporting kiosks with well-over 2200 sensors. With its direct data access, be able to instantly manage vital customer information.

Without interrupting the user or asking for their input, review metrics of your kiosk users and determine each machine's user demographics. Evaluate trends day-to-day, hour-to-hour or even minute-to-minute.

Since a kiosk is designed to operate almost anywhere, we thought the Skyus USB modems should do the same. The Skyus USB modems are designed to be compact, durable, and fit most deployment use cases. With an industrial grade temperature range, Skyus USB modems can handle extreme indoor and outdoor conditions, so your kiosk can live anywhere you need it to.

Verticals include: retail, hospitality, transportation, healthcare, and finance.

Join the revolution. Expand your brand into new places and spaces with the Skyus.
