

Install and manage your device with Inseego Mobile™

Getting secure and reliable internet does not have to be hard

Gone are the days when rolling out and professionally installing your network devices used to be a hassle. It used to require costly truck rolls for installation and troubleshooting, time and effort to figure out the right location for each device for the best signal reception, and the headache of managing all of your devices. Now you and your team can rely on Inseego Mobile App to handle all of these tasks for you, while you can access and control all the functions from any location.

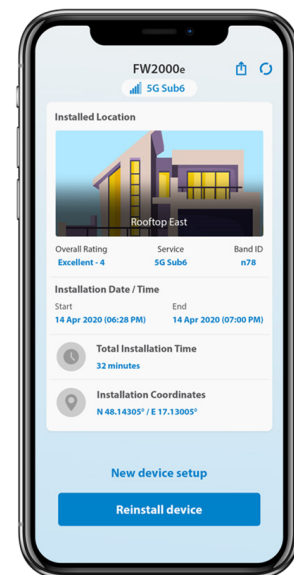

Have the controls at your fingertips with Inseego Mobile

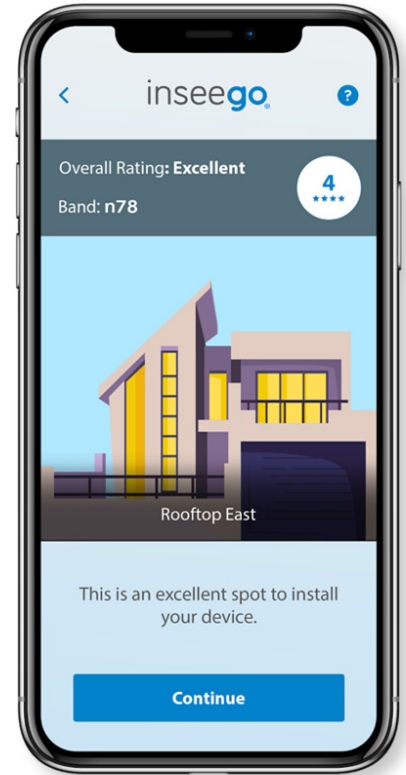

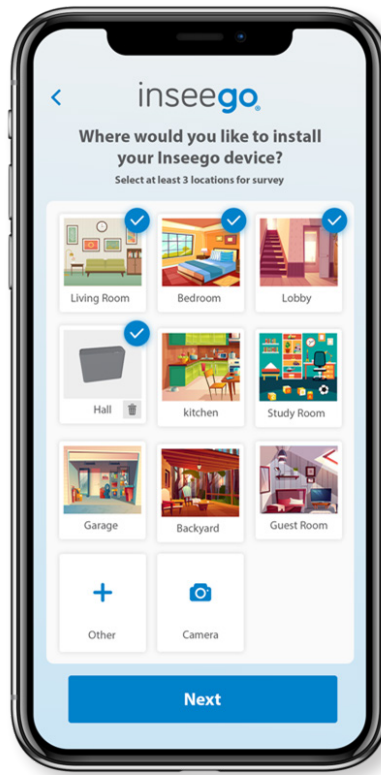

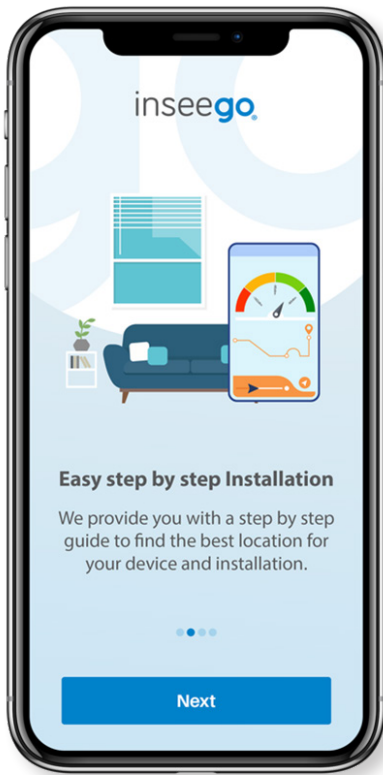

Inseego Mobile is available at the App Store and Google Play enables simple self-installation of Inseego devices. There's no need to schedule a 4-hour window appointment breaking up your day – the app will help you pick the best location for the device in your house and walk you step by step through the installation process.

Inseego Mobile allows you to configure and manage devices from literally anywhere using your smartphone, set up alerts, monitor data usage and set up limits, block unwanted content on any device you have at your home or home office.

Inseego Mobile offers seamless user experience, automatically pairing with your phone, identifying your device, using QR code, and guiding you through the set up and configuration process. The user-friendly dashboard summarizes information about all your devices and gives insights into data usage.

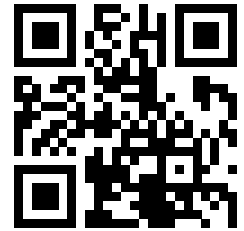

Inseego Mobile offers a powerful tool that saves you time and simplifies management of your home network and devices.

Benefits of Inseego Mobile™

- Automatically establishes Bluetooth connection upon power up & QR-code configures the app for each Inseego device
- Install flow is customized based on device and location
- User-friendly interface dynamically measures signal strength in multiple locations for any 5G band
- Guides users to find the best locations to measure signal strength and calculates a performance rating for each
- Offers simple options to select pre-defined icons or enter custom label for each location
- Location summary presents and ranks each location based on measured performance data
- Offers step-by-step instructions to mount and setup your Inseego device
- Dashboard displays device, network, and installation statistics. Enables installation record to be shared via email or text message.

Learn more about how you can use Inseego Mobile™ app to simplify installation and cost efficiently manage your devices.
