About your modem

NOTE: Hardware and software are constantly evolving – the images and icons you see here are for reference only.

System requirements

Supported platforms:

- Windows 7 or higher
- Mac OS 10.8 or higher
- Linux OS
- Chrome OS

Compatible browsers:

- Microsoft Internet Explorer 7 or higher
- Mozilla Firefox 3.6 or higher
- Google Chrome 9 or higher
- Apple Safari 5 or higher
- Opera 9 or higher

You will also need the following:

- USB Port 2.0 or higher
- Verizon Wireless data plan

A SIM Card is preinstalled. For information on removing or replacing the SIM Card, refer to the User Guide, found online at verizonwireless.com/Support/Verizon-USB730L/.

CAUTION: Do not bend or scratch your SIM Card. Avoid exposing your SIM Card to static electricity, water or dirt.

Status & Data Used LEDs

While starting up, the Status LED will blink slowly in green.

Status LED Description

When not connected

Solid Red	No network available
Solid White	No SIM, SIM locked, SIM error

When connected

Solid Green	Modem ready to use Home network No data being transferred
Blinking Green	Home network available Data being transferred
Solid Amber	Roaming network available No data being transferred
Blinking Amber	Roaming Data being transferred
Blinking White	Software update in progress

Data Used LED Description

Off	Usage info not available.
Solid Green	Data Used < 80%
Solid Amber	Data Used - 80 - 89%
Solid Red	Data Used - 90 - 99%
Blinking Red	Data Used 100% or greater

Connecting to the Internet

Your modem is set to automatically connect to the internet except when you are roaming.

Turn on your computer and insert the modem into a USB Port. While the modem is starting up, the Status LED will slowly blink green.

The Status LED will be solid green when the modem is connected to the Verizon network. (The LED will be amber when roaming.)

Removing your modem

When it's not in use, you can safely remove the USB modem by gently gripping it by the edges and pulling it out of the USB port.

Managing your modem

You can manage and monitor your modem with its user friendly website. With your modem connected, go to <http://my.usb> or <http://192.168.1.1>. You'll be able to:

- Manage connectivity and settings
- View your usage history
- Get software updates
- Connect to Verizon Wireless for product and account information

The first time you visit the Home page, you will be prompted to set your connection preference. The default setting is **Automatically Connect Except when Roaming**. This screen will not be shown again unless a factory reset is performed.

Monitoring data usage

You can monitor your data usage several ways:

- Data Used LED on the device
- Data Usage section on the MyUSB website
- Usage info on the Dashboard app

The Dashboard app

The Dashboard is an optional app that provides device status and usage information on your computer's desktop. To download and install the Dashboard app, go to verizonwireless.com/Support/Verizon-USB730L/.

Support & more

My Verizon

Manage your account, track your usage, edit account information, pay your bill and more at verizonwireless.com/MyVerizon or with the My Verizon app on your mobile device.

Global data

Available in over 205 countries, over 145 with 3G speed. You can connect to the Internet, corporate intranet and email. For a list of destinations and network providers, visit verizonwireless.com/vzglobal.
