

This guide provides instructions for configuring and connecting your Skyus 160.

Step One: Connect Antennas

Fasten your antennas onto the threaded antenna ports by screwing hand-tight. At a minimum, be sure to connect antennas to CELL 1 and CELL 2.

Antenna Ports	Frequency Range	Connector Type
1. CELL 1	690–960 MHz; 1700–2700 MHz	SMA
2. GPS	1570 - 1580 MHz	SMA
3. CELL 2	690–960 MHz; 1700–2700 MHz	SMA

Step Two: Connect to Your Device

Power the device via 4-pin, ethernet, or USB port and connect to a PC using ethernet or USB. Open a web browser and open the web UI by visiting my.skyus/ or 192.168.1.1.

Step Three: Change Your Passwords

The default password is unique to your gateway. However, it is strongly recommended to change your passwords before using your gateway.

Admin Password: On the home page, click the 'Sign In' drop down and select 'Change Password' to change the admin password.

Wi-Fi Passwords: In the UI, navigate to Wi-Fi > Wi-Fi Settings to change Wi-Fi passwords .

NOTE: It is strongly recommended to change both your Admin and Wi-Fi passwords (ensure they are each different) and be sure to retain them in a safe place.

Step **Four**: Use Your Device

Log In to your device at my.skyus/ or 192.168.1.1 using your new credentials.

Verify your device is connected by checking the device UI. If connected, the field will show CONNECTED and the cellular LED should show Magenta, Yellow or Green to indicate signal strength.

LED Reference Table

 Device	 Cellular	 Wi-Fi/Bluetooth	 Navigation
ON/EXTERNAL POWER ON/BATTERY POWER (HIGH) ON/BATTERY POWER (LOW) ON/BATTERY POWER (CRITICAL) ERROR WHEN BLINKING	GREAT SIGNAL GOOD SIGNAL OK SIGNAL POOR SIGNAL NO SIM/ INACTIVE SIM ERROR	WI-FI ON - CONNECTED CLIENTS WI-FI ON - NO CLIENTS BLUETOOTH ON - CONNECTED CLIENTS WI-FI AND BLUETOOTH ARE BOTH ON ERROR WI-FI/BLUETOOTH OFF	SIGNAL ACQUIRED ACQUIRING ERROR GPS OFF

IMPORTANT: Device must be manually restarted after activating the included SIM. In the web UI, go to “Settings”, then “Device”, then “Backup and Restore”, and click “Restart Skyus”.
